

HV SETS

HV Sets of German origin

Stafa is a proud distributor of HV preloaded bolts, nuts, and washers from August Friedberg GmbH. With exclusive dealership rights in the Benelux and France, our range expands with high-quality German HV sets. These products offer fast delivery times and comply with the strictest European standards for durability. Moreover, the nuts are equipped with AF PRO® lubrication for optimal performance and quality.

Highest Quality HV Sets from Germany

The HV preloaded bolts, nuts, and washers from Friedberg are manufactured in Germany. This results in shorter lead times, faster deliveries, and compliance with stricter quality requirements that are guaranteed directly during production.

Wide Availability

The standard range includes HV sets from M12 up to diameter M36, which are available directly from stock. Larger sizes (up to M72) are available on request. Specific requirements can, of course, be arranged in consultation to meet your needs. HV fit bolts conforming to EN 14399-8 are available on request.

Nuts with AF PRO® Lubrication

The nuts from Friedberg are equipped with the unique AF PRO® lubrication, which offers numerous advantages and holds an exclusive position in the market. Thanks to the water- and dirt-repellent properties, the nuts can be used in all weather conditions in compliance with standards.

Normally, moisture can affect the tightening torque of an HV combination, causing it to differ from dry conditions. With AF PRO®, that is a thing of the past: this innovative lubrication ensures that the application remains consistent regardless of weather conditions.

Even if a nut falls into the sand, it's not a problem! The dirt can be easily rinsed off, after which the nut is immediately ready for use again, without compromising the quality of the connection.

The Benefits of Friedberg HV Sets

- ✓ High quality
- ✓ Manufactured in Germany
- ✓ Short delivery times
- ✓ Nuts with AF PRO® lubrication
- ✓ Possibility of supplying injection bolts
- ✓ 3.1 Certificate available
- ✓ 3.2 Certificate on request

Advantages of AF PRO® Lubrication

- ✓ Optimal performance
- ✓ Suitable for all weather conditions
- ✓ Water-repellent
- ✓ Smooth and stable installation
- ✓ Long lifespan
